Preface

Established in 2002 through Ordinance CXIV, Aga Khan University Examination Board (AKU-EB) is Pakistan's first private autonomous examination body for secondary (SSC) and higher secondary (HSSC) school certifications. Its vision is to be a model of excellence and innovation in education in Pakistan and the developing world.

One of the ways in which AKU-EB achieves its vision is by developing syllabus which inculcates conceptual thinking and higher-order learning based on the National Curriculum. AKU-EB revises its syllabus every 4 years so that it continues to meet the needs of students, teachers and examiners.

The aims of the current syllabus review of SSC and HSSC in 2016 were to:

- Ensure continued compatibility with the goals of National Curriculum of Pakistan.
- Review the content for inclusion of new knowledge and deletion of obsolete knowledge.
- Review the content for clarity and relevance as per the changing needs of students, teachers and examiners.
- Enhance and strengthen continuation and progression of content both within and across grades IX - XII (SSC and HSSC).
- Ensure the readiness of students for higher education.

During this syllabus review, the needs of all the stakeholders were identified through a needs-assessment survey. Students and teachers of AKU-EB affiliated schools from across Pakistan participated in the survey. Thereafter, a revision panel, which consisted of examiners, schools teachers of affiliated and non-affiliated schools, teacher trainers and university academics, reviewed and revised the syllabus using a planned, meticulous and standardised process.

This year, AKU-EB took the initiative of introducing a 'Concept Map' for each syllabus which represents links among the key concepts of the syllabus. These have been designed to improve students' interest in the subject, facilitate conceptual thinking and make learning and teaching experience memorable.

The syllabus is organised into topics and subtopics. Each subtopic is further divided into achievable student learning outcomes (SLOs). The SLOs of the cognitive domain focus are each assigned a cognitive level on which they have to be achieved. These cognitive levels are 'knowledge', 'understanding' and 'application', including other higher order skills. This is followed by the Exam Specifications which gives clear guidance about the weightage of each topic and how the syllabus will be assessed.

This syllabus has been designed to empower the students and teachers to take charge of learning and teaching and reduce their dependence on a single textbook. Some syllabus support material¹, including suggested resources, has also been developed with the syllabus to guide students and teachers. However, these are not exhaustive and students and teachers are encouraged to use multiple books and online resources to achieve the SLOs of the syllabus.

¹ Available at examinationboard.aku.edu

The development of the revised syllabus have been made possible by the creativity and relentless hard work of Curriculum and Examination Development unit and the constant support provided by all the other units of AKU-EB. We are particularly thankful to Dr Sohail Qureshi for his very useful feedback on revising the syllabus review process, to Dr Naveed Yousuf for his continued guidance and support throughout the syllabus revision process and to Raabia Hirani for leading the syllabi revision. We are also thankful to all the students and teachers who took part in the needs-assessment survey and to the principals of AKU-EB affiliated schools who made this endeavour possible by facilitating and encouraging their teachers to be a part of the survey and the syllabus revision panel.

With your support and collective hard work, AKU-EB has been able to take the necessary steps to ensure effective implementation of the National Curriculum of Pakistan through this syllabus. We are confident that this syllabus will continue to provide the support that is needed by students to progress to the next level of education and we wish all the best to students and their teachers in implementing this syllabus.

Dr Shehzad Jeeva
Director, Aga Khan University Examination Board
Assistant Professor, Faculty of Arts and Sciences, Aga Khan University

Introduction to AKU-EB Syllabi

1. Aga Khan University Examination Board (AKU-EB) has a mandate by Ordinance CXIV of 2002 ‘to test the attainment of the objectives of the national curriculum, for the purpose of enhancing student learning, and to do all such things that may be considered appropriate for the improvement of education in respect to teaching and learning, institutional effectiveness and all things ancillary and incidental thereto’.
2. The AKU-EB syllabi are an important tool in the achievement of this mandate. These syllabi are based on the National Curriculum of Pakistan 2006 and the National Scheme of Studies 2006 – 2007. The syllabi bring together all those cognitive outcomes of the National Curriculum statement which can be reliably and validly assessed. Moreover, the syllabi aim to achieve the pedagogically desirable objectives of the National Curriculum which encourage ‘observation, creativity and other higher order thinking skills’, better meeting the needs of the students of the twenty-first century.
3. The syllabi guide the students, teachers, parents and other stakeholders regarding the topics that will be taught and examined in each grade (IX, X, XI and XII). In each syllabus document, the content progresses from simple to complex, thereby, facilitating a gradual, conceptual learning of the content.
4. The topics of the syllabi are grouped into themes derived from the national curriculum. The connection between various themes and topics is highlighted in the ‘**concept map**’ provided at the beginning of each syllabus. This ensures that students begin to understand the interconnectedness of knowledge, learn conceptually and think critically.
5. The topics of the syllabi are divided into subtopics and **student learning outcomes (SLOs)**. The subtopics and the SLOs define the depth and the breadth at which each topic will be taught, learnt and examined. The syllabi complement the national curriculum by providing enabling SLOs where needed to scaffold student learning.
6. Each SLO starts with an achievable and assessable **command word** such as describe, relate, evaluate, etc. The purpose of the command words is to direct the attention of teachers and students to specific tasks that the students are expected to undertake in the course of their studies. The examination questions are framed using the same command words or their connotations to elicit evidence of these competencies in students’ responses.
7. The SLOs are classified under three **cognitive levels**: knowledge (K), understanding (U) and application and other higher order skills (A) for effective planning during teaching and learning and deriving multiple choice questions (MCQs) and constructed response questions (CRQs) and extended response questions (ERQs) on a rational basis from the subject syllabi, ensuring that the intentions of the national curriculum are also met during examinations.

8. By focusing on the achievement of the SLOs, these syllabi aim to counter the culture of rote memorisation as the preferred method of examination preparation. While suggesting relevant, locally available textbooks for achieving these outcomes, AKU-EB recommends that teachers and students use multiple teaching and learning resources for achieving these outcomes.
9. The syllabi follow a uniform layout for all subjects to make them easier for students and teachers to follow. They act as a bridge between students, teachers and assessment specialists by providing a common framework of student learning outcomes and **exam specifications**.
10. On the whole, the AKU-EB syllabi for Secondary School Certificate (SSC) provide a framework that helps students to acquire conceptual understanding of the content of the national curriculum and learn to critically engage with it. This lays a solid foundation for HSSC and beyond.

Subject Rationale of AKU-EB English Compulsory

What will you learn in AKU-EB English Compulsory?

- English is the major international language of education, research, diplomacy and business, making it the medium for the communication of new ideas all over the world. AKU-EB's English Compulsory syllabus, hence, focuses on the need to interact globally and locally, in academic and non-academic settings.
- The syllabus takes a skill-based approach to language learning and focuses on language learning, academic literacy and effective communication strategies. The skills taught in the English Compulsory course at SSC and HSSC are not an end in themselves but have been designed to support and contribute to the literacy requirements needed for humanities and science subjects.
- For a majority of Pakistani students, learning English is a conscious effort which requires deliberation, guidance and practice. The National Curriculum (NC) for English Language 2006 addresses this reality in its standards, competencies and student learning outcomes. The AKU-EB syllabi reflect focused approach and the path to achievement of these outcomes through a particular sequence of learning goals.
- Steps have also been taken to make the syllabus more “needs based”, by identifying the progression within and across the grades, i.e. from class IX to class X, with a progression from simpler to more demanding types of text – both reading and listening passages.
- All four language skills – reading, writing, listening, and speaking – have been addressed in the syllabi. In fact, AKU-EB is the only Pakistani Examination Board to assess not only reading and writing, but listening skills as well.

Where will it take you?

- Proficiency in English is a requirement for most university courses in Pakistan and across the world. Hence, a successful completion of this course will open the doors for further successes in life. The successful implementation of the objectives of AKU-EB English Compulsory syllabus in classroom and assessment practices will facilitate you in taking up various national and international competitive and placement examinations and courses of higher studies like:
- IELTS/ GRE/ TOEFL/ GMAT/ SAT
- The English courses in universities which are mostly based on the communication and comprehension needs of the students.

- By pursuing English major courses (Literature and Linguistics) in universities, the following career paths may be pursued:
 - Civil Services
 - Journalism
 - Public Relations
 - Teaching/ Education Management
 - Marketing/ Advertising
 - Communications / Editing/ Content Development
 - Writing (academic/ research/ fiction)
 - Translation

How to approach the syllabus?

The concept map on the next page will give you an overview of your entire syllabus. After this, the topics and Student Learning Outcomes (SLOs) will tell you the details about what you have to achieve. And finally, the Exam Specifications will tell you what to expect in your examination.

What is the concept map telling you?

Language grows!

There are many striking parallels between evolution of life forms and evolution of languages. The analogy of a tree is hence used to visualise the underlying theory of skill-based acquisition of language. Listening and reading are receptive skills which are required for the making of meaning from ideas or information. These skills constitute ‘roots’ of the language learning process along with knowledge of some basic grammar. Speaking and Writing are productive skills that enable the expression of meaningful ideas.

The map intends to illustrate that by paying adequate attention to listening and reading, new words/ phrases could be learnt which will help in producing spoken and written texts. Grammar and vocabulary, which constitute knowledge about language, are the building blocks that are required for the application of the receptive and productive skills for effective communication. Consolidating and expanding the knowledge about language systematically, i.e. from roots to branches, through enhanced exposure to different purposeful texts, will result in pragmatic evolution of language skills.
